Welcome to PanaFont

PanaFont is designed especially for graphics arts and video professionals who use a variety of fonts in their work. With PanaFont you can see, at a glance, all the active fonts on your computer.

Matching a font from an existing project has never been easier. Just enter the new text in PanaFont's sample text field and see exactly how your text will look in any font, at any size.

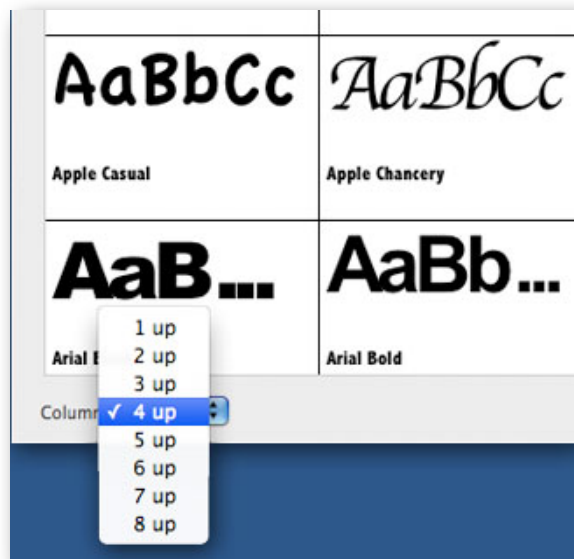

When you find a group of fonts you like, you can use PanaFont's font windows to experiment with point size, formatting, and color. Design your text by mixing in as many fonts and font sizes as you wish. You can then copy your text design and paste it into any application that supports styled edit fields.

Viewing Your Fonts

There are several ways to control how your computer's font library is viewed.

- Enter text into the Sample Text field to have it displayed as the sample text in each font's window.
- Use the Font Size slider to control how large each font sample appears. Fonts can be displayed in any size from 10 points to 200 points.
- Select the number of columns to display from the Columns pop-up menu at the bottom of the main window.
- Resize the main window by dragging the resizing icon at the bottom right corner of the window.

The Columns pop-up menu.

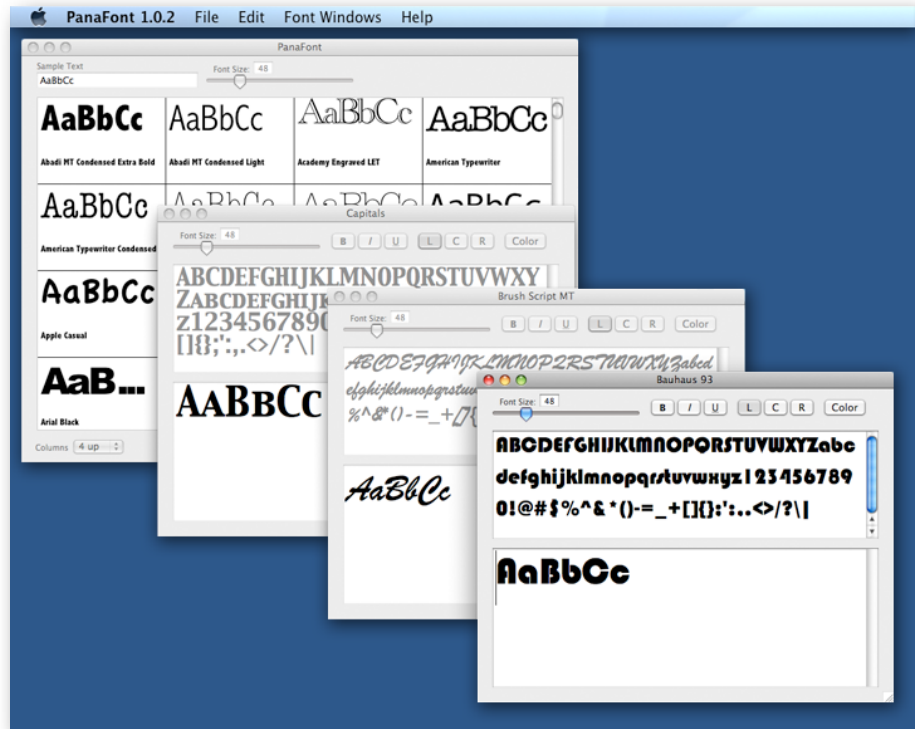

Using Font Windows

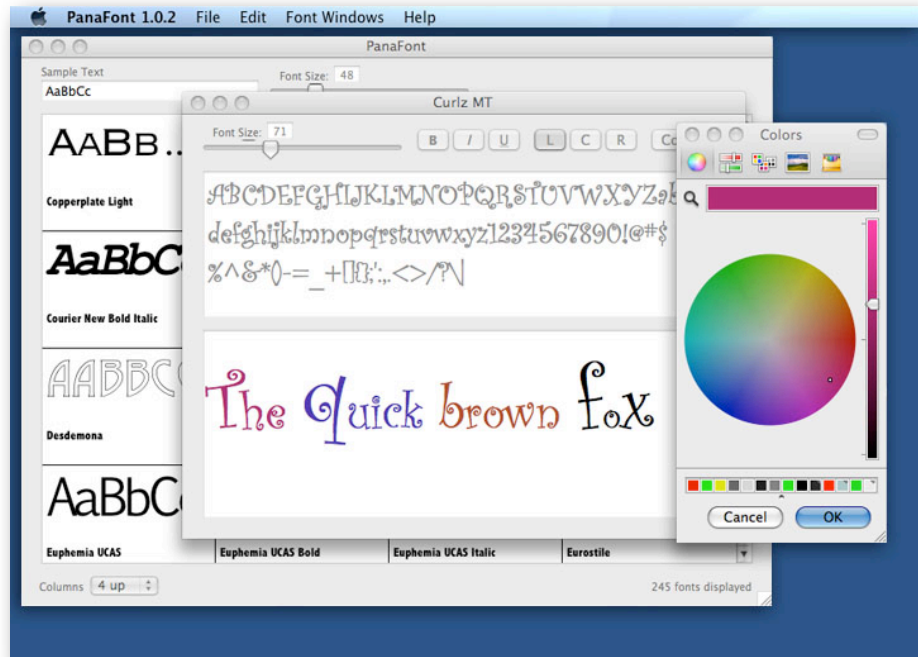

Font Windows allow you to see all the characters in a font family and experiment with them. When you're ready, you can copy and paste your new text into any application that supports styled edit fields.

- To open a Font Window double-click on any font in the main window.
- Font Windows show all the displayable characters in a font family. You can cut and paste text from one Font Window to another.

You can have as many Font Windows open as you like.

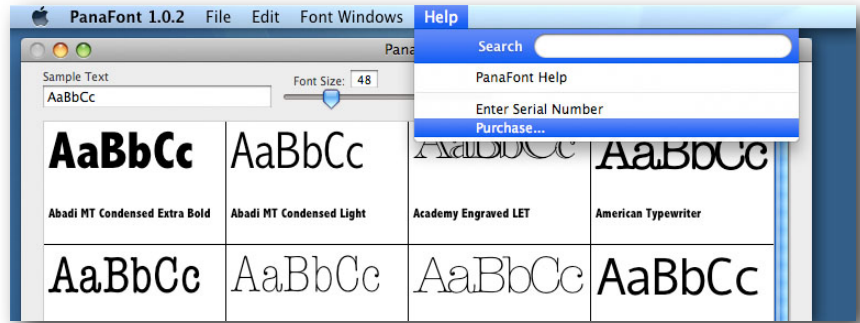

Use the Font Window to experiment with size, formatting and color.

Purchasing PanaFont

PanaFont can be quickly and easily purchased online. When you first install PanaFont the application will run in Demo Mode and be limited to displaying only the first 20 fonts found on your computer. To activate the full version of PanaFont and show all of your computer's fonts you must purchase the application online.

- **You must be connected to the internet to purchase PanaFont.** However, once the purchase process is completed, it is not necessary to have an internet connection to use PanaFont.
- Select the **'Purchase...'** option from PanaFont's **'Help'** menu.
- Follow the online instructions to purchase and activate the full version of PanaFont.

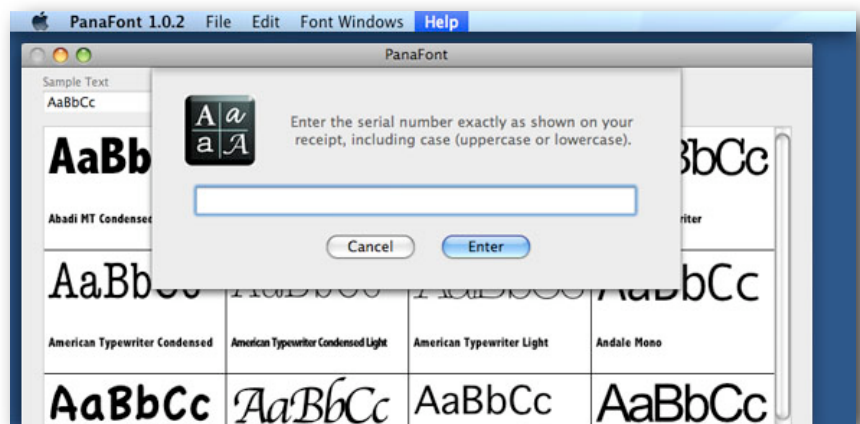

- At the end of the purchase process PanaFont will be activated automatically and all functions unlocked.
- A receipt will be emailed to you that includes purchase information as well as your serial number for future reference.
- PanaFont purchases are made using the eSellerate online software delivery system. If you need technical support or have questions about the online purchase process go to <http://shopper.esellerate.net> for more information.

Manually Entering a Serial Number

Even though your serial number is entered and verified automatically during the purchase process, PanaFont includes an option to enter your serial number manually if necessary. **This step is not necessary after purchasing online.**

- Select **'Enter Serial Number'** from the **'Help'** menu.
- Enter your serial number exactly as it appears on your PanaFont sales receipt. The serial number is case sensitive, so be sure to match all upper and lower case characters.

- Once the serial number is entered, PanaFont will be activated and fully functional.

Technical Support
